

Green Supply Chain Assessment

Overview

Business practices are extending towards sustainable commitments in their value chains, from subsidiaries to suppliers. Supply chain delivers many intangible benefits and rewards apart from the inherent social and environmental risks and the governance challenges it poses. Focus on inclusive markets and advance sustainable development as per the SDG's stated by United Nations, sustainable supply chain management indeed can be a strong driver of value and success – for business as much as for society.

Green Supplier Certification focuses on small and medium enterprises to be a part of the circular economy. The certification validates the supplier follows green practices and is eligible as a sustainable entity of the supply chain in the economy. This certification is designed to facilitate companies initiate and advance their supply chain sustainability efforts.

- Direct consideration as a potential sustainable supplier for procurement by responsible corporate organizations
- Monitoring and Evaluation of the practices in your organization which will be required as a part of supply chain sustainability for customers who are responsible corporate organizations
- Focus on maintaining long-term relations with all partners and customers
- Facilitating good governance and business ethics as a key pillar of well-functioning markets

- Effective management of associated environmental impacts
- Fulfilment of vision towards sustainable business operations
- Improved customer reach and recognition
- Positive outlook amongst stakeholder's like investors, employees, government agencies, local community, employees, etc.
- Get a USP in private and government tenders and also be eligible for the same
